Cavite, Philippines

Detail-oriented IT graduate with hands-on experience in front-end development, quality assurance, and IT support. Skilled at enhancing user experiences, identifying and resolving issues, and ensuring overall product quality through thorough testing and documentation. Proactive and adaptable, with strong collaboration, troubleshooting, and rapid learning abilities. Committed to leveraging these skills in practical environments to deliver reliable results and grow professionally.

Work Experiences

Macrologic Diversified Technologies Inc. - **Cavite, Philippines**   Apr 2025 - Aug 2025
Web Developer Intern

An IT solutions provider offering cloud services, systems integration, managed services, and infrastructure support, serving clients across government, manufacturing, education, and enterprise sectors.

- Performed functional testing and UI validation on three company websites (Macrologic, SAINT, Marina Black Sand Resort).
- Executed test scenarios related to responsiveness, browser compatibility, content accuracy, and user flows, providing feedback to development and content teams.
- Supported front-end enhancements and validated integrations with APIs.
- Documented technical changes, issues, and updates for internal teams, ensuring clear communication and traceability.
- Troubleshot WordPress, PHP, SEO, and database issues.

Innovative Thinker Software Solutions Corporation - **Cavite, Philippines**   Nov 2024 - Feb 2025
IT Intern

A Philippine-based software development company that provides business automation solutions, including accounting and payroll systems, along with custom software, IT support, and technical training for various industries.

- Executed manual test cases for Water Supply Software and MeterPal, ensuring stability and readiness for release.
- Identified, documented, and reproduced bugs, improving communication between QA and development teams.
- Conducted UX assessments to ensure functional completeness and user-friendly design, contributing to improved client satisfaction.
- Participated in creating prototypes for a payroll system using Bootstrap, PHP, AJAX, MySQL, supporting requirement validation.
- Assisted in preparing test data, verifying features against requirements, and reviewing system behavior across different scenarios.

Education Level

National University – Dasmariñas - **Cavite, Philippines**   Aug 2021 - Jul 2025
Bachelor of Science in Information Technology with Specialization in Mobile and Web Applications

- Created front-end UI/UX components to improve navigation and user clarity for the AirSol Online Booking System.
- Developed user-friendly front-end features to simplify online request processes for Easydocs Barangay Document Request System.

Organisational Experience

Microsoft Learn Student Ambassadors (NUD) - **Cavite, Philippines**   Aug 2024 - May 2025
